

PERMANENT MAKE-UP AFTERCARE

BLOT

Gently both area with a clean tissue to absorb any excess lymph or blood. This will be done directly after the completion of your service anywhere from 5-15 minutes or until oozing of lymph and blood has stopped. This will prevent more scabbing from happening and aid in a faster healing process. Letting blood and lymph collect on open wounds once dry will result in itchiness, large dark scabbing and prolong awaited results.

WASH

Use the Cetaphil provided in your kit to wash your new tattoo. Wash twice a day before showering or 15 min after showering. Do not wash in the shower. Keep as dry as possible avoiding saturating the brows with water while bathing. Using clean hands, warm water and a small amount of Cetaphil, clean your brows using a soft circular motion as not to scrape off any scabs. Rinse thoroughly and blot with a clean tissue. Let air dry for 5 minutes. Avoid touching brows with dirty hands to avoid infection.

MOISTURIZE

Using the After Inked moisturizer in your kit, you may apply a small amount with clean hands or a q-tip to your brows. Only do this on clean dry brows. Use sparingly. If you see the lotion, it is too much!

MICROBLADING EMOTIONS

DAY 1

OMG! I'M IN LOVE WITH MY NEW BROWS. THANK YOU!

DAY 2-4

I DON'T LIKE THIS COLOR, IT'S TOO DARK.

DAY 5-7

OH NO! MY BROWS ARE SCABBING AND FALLING OFF!

DAY 8-10

UMMMM... MY BROWS ARE GONE!

DAY 14-28

SWEET! MY BROWS ARE COMING BACK! STILL LOOKING A LITTLE PATCHY AND UNEVEN.

DAY 42 (AFTER TOUCH-UP)

AWWWW, THEY ARE BEAUTIFUL! I LOVE THEM!
